

Hydra HD Quick Reference Guide

1. Welcome!

Thank you for using Entone's Hydra High Definition Multi-Television Video Gateway. This quick reference gives quick instruction for setting up and using Hydra. For detailed setup and usage instruction, please refer to the *Hydra HD User's Guide* and the *URC Plus User's Guide* in <http://www.entone.com>.

2. Before You Begin

Check that the video output connector of the Hydra is properly connected to the input connector of the TV(s).

In your TV, select the input source that the Hydra is used.

"MATV OUTPUT" by default uses CATV channel ID 10, 23 and 39 for decoder 1, 2 and 3 respectively. "TV OUT" for decoder 1 by default uses CATV channel ID 10.

Check that you have connected Hydra "ETHERNET" to your network access device. For details of connecting Hydra to the network, please refer to your service provider.

If you have an external hard drive, connect the external hard drive using the eSATA cable. External hard drive requires separate power supply. Power up the external hard drive before powering up Hydra.

Software upgrade is required when you power up Hydra for the first time. Software upgrade may take 5-10 minutes. Do not power off during software upgrade.

3. Install Remote Control Batteries

Install the two AA batteries (provided) into the remote control.

Important!! Use only new AA Alkaline batteries to insure consistent operation.

4. Understanding the Remote Control

This 3 mode Universal Remote Control can be programmed to control your Hydra and up to two other devices. The remotes can be set up by following these simple instructions.

If your Hydra has the URC PLUS logo on the top right side of the front panel, it only works with the remote control with the URC PLUS logo.

5. Connect Antenna

Connect the small antenna (provided) to the "Remote Antenna" connector on the back panel of the Hydra.

6. Using the Remote Control

The diagram and list provide a brief description of your remote control features. Entone provides this as a general guide to remote control usage. Functions may vary between different service providers.

Please refer to your service provider's manual for specific information on remote usage and features.

1. **SETUP** Special Key reserved for remote programming functions.
2. **INPUT** Changes the current A/V input of the selected device.
3. **POWER** Switches the power on/off for the currently selected device.
4. **STB** Puts remote control in STB mode.
5. **TV** Selects to control TV.
6. **LANG** Toggles closed captioning on or off on decoder 1.
7. **GUIDE** Displays electronic program guide.
8. **VOL+/-** Raises or lowers volume of the currently selected device.
9. **LAST** Changes channel to the most recently viewed channel.
10. **PAUSE** Pause button for VOD or live channel.
11. **CHAPTER** Goes to previous or next chapter for VOD.
12. **FAST REV/FWD** Starts fast reverse or fast forward for VOD or live channel.
13. **RED** Reserved for future use.
14. **GREEN** Reserved for future use.
15. **NUMBER KEYS** Allows direct access to specific channels and menu items.
16. **ENTER** Reserved for future use.
17. **DTV** Returns to live programming.
18. **Movies** Display the VOD menu.
19. **Record-it** Displays the digital recorder menu.
20. **Promos** Displays the promotion menu.
21. **AUX** Selects to control AUX device.
22. **INFO** Displays on-screen information about the current television program.
23. **MENU** Displays the on-screen menu.
24. **EXIT** Exits the current menu item.
25. **CH UP/DOWN** Changes channel up or down.
26. **RECORD** Records live channel.
27. **STOP** Stop button for VOD or live channel.
28. **ARROW KEYS** Navigates right, left, up, down in the on-screen guide.
29. **OK** Executes the currently selected menu option.
30. **PLAY** Play button for VOD or live channel.
31. **BLUE** Reserved or future use.
32. **YELLOW** Reserved for future use.
33. **MUTE** Turns the volume of the currently selected device off.
34. **Media** Displays the web menu.
35. **Music** Displays available music channels.
36. **Help** Displays the help menu.
37. **Phone** Displays the Caller ID menu.

7. Programming Remotes For Use With Hydra

First, you must program your remotes for use with your Hydra. The Hydra comes with 3 URC remotes. Each remote can be programmed for use with a different TV/Room. (Refer to the *Hydra HD User's Guide* for more information on in-home configurations.)

- 1 Press and hold the "OK" button on the Hydra front panel for approx. 5 seconds. When releasing the "OK" button, the Hydra front panel will display "RC REG". The Hydra is now in remote registration mode.

- 2 Identify the remote control, which is labeled with a number 1, 2, or 3 on the battery cover plate on the bottom of the remote, as shown below:

- 3 Press and hold the "STB" button on the remote control for about 4 to 5 seconds. The "STB" button backlight LED will light.
- 4 Press the "STB" button once again. Both the "STB" and "AUX" button backlight LED will light to indicate that the remote control is in registration mode.

- 5 Use the number keys to send the registration event:
 - Press "1" to send the "Register remote control to Decoder 1" event for Remote #1.
 - Press "2" to send the "Register remote control to Decoder 2" event for Remote #2.
 - Press "3" to send the "Register remote control to Decoder 3" event for Remote #3.

- ⑥ If you press a key other than "0", "1", "2" or "3", or if you do not press a button within about 10 seconds, the STB button backlight LED will turn off, and the remote control registration process terminates.

After you enter a registration event, the "STB" button backlight LED on the remote control will blink twice and the Hydra front panel will display "RC REG Dx" to indicate that the registration process was successful.

- ⑦ Repeat the steps above for each remote control. You can register at most 3 remote controls for each decoder. Each remote control can only be registered for one decoder.

8. Manually Program Additional Devices

Perform the following steps to program the TV and AUX device:

- ① Locate the device code for your desired device in the device code table provided in the Appendix. If you could not find the device code for your device or it does not work after trying the listed device codes for your device brand, then you can go to the next section to try the auto-search procedures.
- ② Turn on your device and with media inserted (if applicable).
- ③ On the remote control, press a device mode key once (i.e., "TV" or "AUX"). **NOTE:** Use the "AUX" mode key to program control of VCR, DVD player, cable box, satellite set-top-box and audio device.
- ④ Press and hold the "SETUP" key until the selected mode key backlight blinks twice, then release "SETUP". The device mode key will light up.
- ⑤ Enter the four-digit device code for you device. If you perform this procedure correctly, the selected device mode key backlight will blink twice. **NOTE:** If you enter an invalid device code, the selected device mode key will fast blink 7 times. Device program mode will be terminated.
- ⑥ Aim the remote control at your device and press the "POWER" once. The device should be turned off. If it does not respond, repeat the above steps.

9. Auto-Scan (Program Additional Devices)

If your device does not respond to the remote control after trying all devices codes listed for you brand, or if your brand is not listed at all, try searching for your device code as follows:

- ① Power on the device and on the remote control, press the desired device key once. Then press and hold "SETUP" until the device key blinks twice, then release "SETUP".
- ② Press the "POWER" key once and aim your new remote at the device.
- ③ Press either the "CHANNEL UP" key or "CHANNEL DOWN" key to do device auto-scan.
- ④ In this search mode, the remote control will send IR codes from the library in 5 second intervals. The device key will be on and blink every 5 seconds while in the device scan mode.
- ⑤ If the device turns off, a working code has been found. Press "OK" once to lock in the code. The selected mode key will blink twice.
- ⑥ If all code sets of that device are exhausted in the search and the "OK" is not pressed, the selected device key will fast blink 7 times and the search mode will be terminated.

NOTE: Auto-Scan does not scan device codes from 4056 to 4071. For decode codes from 4056 to 4071, you have to enter the device code manually.

10. Hydra On-Screen User Menu

The Hydra User Menu is an on-screen setup menu to set up your Hydra features. You need to connect the TV properly before using the User Menu.

Each decoder has its own User Menu. The User Menu provides the following setup features:

	Decoder 1	Decoder 2	Decoder 3
TV 1 Channel ID	CATV Channel ID	N/A	N/A
TV 2 Channel ID	CATV Channel ID	N/A	N/A
TV 3 Channel ID	CATV Channel ID	N/A	N/A
Resolution	1080i, 720p, 480p, 480i	N/A	N/A
Closed Captioning	Enable, Disable	N/A	N/A
Fan Speed	High, Middle, Low, Off	N/A	N/A
HPNA Mode	Coax, Phone	N/A	N/A
TiVo IR Key Code	MAGNAVOX 0224-B, CENTURION 0092-B Toshiba TSR-202 Hitachi HDS-100R	N/A	N/A

To enter the User Menu:

- ① Use the corresponding remote control of the decoder.
- ② Press "INPUT" and then "MENU" in sequence within 1 second.

NOTE: The features available in User Menu may vary in different middleware. Some of the features can also be set up through the user menu of the middleware.

NOTE: Reboot of Hydra is required for the new channel ID change to take effect.

11. Captioning

Decoder 1 captioning is controlled by Hydra. Decoder 2 and 3 captioning is controlled by your TV. (Refer to your TV User's Guide for details on how to control your TV captioning.)

To turn captioning on or off on decoder 1 either:

- ① Press "LANG" button on the remote.
- ② Use the User Menu.

NOTE: Control of captioning may vary for different service providers. For detailed usage of captioning, please refer to the service provider.

12. Setting HDMI/Component Resolution

You can use User Menu or the Hydra front panel UP arrow to set the resolution. To use Hydra front panel UP arrow to set resolution:

- ① Press and hold the Hydra front panel “UP” arrow for 5 seconds.
- ② Keep on pressing the “UP” arrow, the resolution indicator in the Hydra front panel display will illuminate in a round robin manner from “1080i -> 720p -> 480p -> 480i”.
- ③ When your desired resolution is illuminated, release the “UP” arrow. Then, both the HDMI and Component outputs will be set to the selected resolution.

NOTE: If your TV does not display the video or error message is displayed after you have selected a new resolution, your TV may not support the selected resolution. Repeat the above procedures again to find a resolution supported by your TV.

NOTE: The S-Video, RCA Composite and RF outputs are always set to 480i and will not be affected by the HDMI and Component resolution setting.

Appendix - Device Codes

Your Universal Remote Control (URC) can control many brands and models of television, VCR, DVD and other types of audio-visual equipment. The following pages list device codes for many categories and brands of equipment. Many brands list more than one code, and you may need to test several codes to find the best match for your equipment. Your equipment may be supported even if your brand is not shown in the list below. If you cannot locate your brand, or none of the listed device codes works, then you may still use the auto-scan feature to try to locate a suitable device code. Instructions for using the auto-scan feature are located on page 5 of this guide.
